

# US PSYCHIATRY

Established: October 2007

## Aims and Scope

- *US Psychiatry* enables time-pressured psychiatrists to stay abreast of key advances and opinion in psychiatric practice in the US.
- *US Psychiatry* comprises balanced and comprehensive articles written by leading authorities addressing the most important and salient developments in the field.
- *US Psychiatry* endeavors to support psychiatrists, neurologists, and leading industry professionals in continuously developing their knowledge, effectiveness, and productivity. The editorial policy has been designed to encourage discussion among this peer group.
- Comprehensive bibliographies for each article mean that *US Psychiatry* is an informative and valuable reference tool for use throughout the year.

## Structure and Format

- *US Psychiatry* is an annual journal comprising review articles, case reports, practice guides, theoretical discussions, and original research.
- The structure of each edition of the publication comprises section categories determined by the Editor. The degree of coverage assigned to each category is the decision of the Editor, and in part reflects the views of the Editorial Board.
- Articles are fully referenced, providing a comprehensive review of existing knowledge and opinion.
- Each edition of *US Psychiatry* is also replicated in full online at [www.touchpsychiatry.com](http://www.touchpsychiatry.com)

## Editorial Expertise

*US Psychiatry* is supported by various levels of expertise:

- Guidance from an Editorial Board consisting of leading authorities from a variety of psychiatric disciplines.
- Invited contributors are recognized authorities from their respective fields.
- Peer review—conducted by experts appointed for their experience and knowledge of a specific topic.
- An experienced team of Editors and Technical Editors.

## Peer Review

- On submission, all articles are assessed by the Editor to determine their suitability for inclusion and appropriateness for peer review.
- The Editor, following consultation with either a member of the Editorial Board or the author(s), identifies appropriate reviewers, who are selected on the basis of their specialist knowledge in the relevant area.
- Following review, papers are either accepted without modification or returned to the author(s) to incorporate required changes. The Editor reserves the right to accept or reject any proposed amendments.

## Submissions and Instructions to Authors

- Contributors are identified and invited by the Editor with the support of the Technical Editors and guidance from the Editorial Board.
- Following acceptance of an invitation, the author(s) and Editor formalize the working title and scope of the article.
- Subsequently, the Editor provides an 'Instruction to Authors' document and additional submission details.
- The Editor is always keen to hear from leading authorities wishing to discuss potential submissions, and will give due consideration to any proposals. Please contact the Editor for further details. The 'Instruction to Authors' information is available for download at [www.touchpsychiatry.com](http://www.touchpsychiatry.com)
